NUMERICAL DIRECTORY

ITS PRACTICAL USE IS TO GIVE

Information—as to street descriptions and their location on city map.

Information—as to the location by number of intersecting streets and their relation to other numbers

Information—as to the name of every householder at any given street number.

Information—as to the name of every place of business and its nature at any given street number

Information—as to the location of telephones (*) by street number

Information—as to the character of any street or district

Information—as to the number of families living at any number and who they are.

Information—as to the correct spelling of names when addresses are known

Information—as to sections capable of producing the greatest amount of business by personal solicitation or "direct mail".

Finally—

It takes the "Who is it?" out of your neighborhood and adds another link to your chain of friendliness

THE PRICE & LEE CO.

NEWARK NUMERICAL DIRECTORY

EXPLANATORY NOTES

The streets are arranged alphabetically with their description, each description followed by a numerical arrangement of householders, places of business and street intersections. (Arrangement by rotation where no numbers have been assigned.)

The abbreviation r between the street number and the name signifies "rear."

The word "vacant" after a number signifies that the house, store or office at that number was vacant when canvass was made.

*Denotes householders and places of business having telephones.

"(Right odd)" after street description indicates odd numbers on right side of street.
